Assessment of Exemplar

Course 4 Waze project lab

Compare the exemplar to the Python notebook you completed. Your responses may differ from the exemplar, but that is to be expected. What did you do well? Where can you improve? Use your answers to these questions to guide you as you progress through the end-of-course projects in the certificate.

Note: The exemplar represents one possible way to complete the Python notebook. Yours might differ in certain ways, such as your specific language, answers to questions or the layout you selected from the template offerings. What's important is that you have an overall understanding of the purpose and functionality of a Python notebook for data analysis.

Your Python notebook should:

- Include the correct code for computing descriptive statistics and conducting a hypothesis test
- Clearly communicate your responses to questions about code input and results

Course 4 executive summary

Compare the exemplar to your completed executive summary. Your responses may differ from the exemplar, but that is to be expected. What did you do well? Where can you improve? Use your answers to these questions to guide you as you progress through the end-of-course projects in the certificate.

Note: The exemplar represents one possible way to complete the executive summary. Yours may differ in certain ways, such as your specific language and visual design. What's important is that you have an overall understanding of the purpose and organization of executive summaries for data projects.

Your executive summary should:

- Include key information that you want to share with teammates and/or stakeholders
 - Use clear and concise language to effectively communicate your results
-
